### **AIR POLLUTION CONTROL**

#### **Course Objectives**

The course will address the following:

1. To know the analysis of air pollutants
2. To know the Threshold Limit Values (TLV) of various air pollutants
3. To acquire the design principles of particulate and gaseous control
4. To learn plume behavior in different environmental conditions

#### **Course Outcomes**

Upon successful completion of this course, the students will be able to

1. Identify sources of air pollution
2. Control Automobile pollution and Odor pollution
3. Judge the plume behavior in a prevailing environmental condition
4. Decide the ambient air quality based on the analysis of air pollutants
5. Design particulate and gaseous control measures for an industry
